

## Introduction & Game Ideas

*Webber® Photo Cards - Let's Predict* contains 60 engaging photos to help your students improve critical and inferential thinking, narrative creation, expressive grammar, and more! Use these photos during spoken or written activities. Incorporate an open-ended game board for more fun. Additional game ideas follow:

1. **And then...** – The clinician chooses a card and starts the story by describing the card. Then each student follows with a sentence to build on the story. Encourage the use of transitional words and story elements.
2. **What would you do if...** – Use the cards as problem-solving prompts. For example, the clinician shows card #43 and asks, "What would you do if you spilled the milk?"
