

Musk oxen have thick hairy coats that can keep them warm in the Arctic.

Males shower themselves with pee. They make a big stink. They smell musky. Their smell is very strong. It will make your eyes water.

Musk oxen use their smell. It helps them attract mates.

## Did You Know...?

- Chemicals produced by some millipedes can burn or blister human skin. Don't touch millipedes!
- Some people keep skunks as pets. They remove the scent glands. There could be up to 5 million pet skunks in the United States.
