

FAIRIES

Other types of fairies include leprechauns, goblins, and even trolls.

Fairies are magical creatures. They're **supernatural**. They're beyond the laws of nature. They control fate. They used to live with humans. This was when humans believed in magic. Then, humans stopped believing in magic. So, fairies hid. But they're still here. They live all around us. They make themselves invisible. They appear. They disappear. They do this quickly. They feel weak when seen by humans.

Fairies can look human. But they're not. Some are way smaller. Some are the same size. Some are giants. Some have wings. Some are beautiful. Some are ugly. There are many different types of fairies.
