STRANGE ... But True

Plant Tricks

Plants have no hands, feet, or brains. And no place to hide. But plants can be sly. They play tricks to stay OK.

The stone plant looks like a rock. Its leaves are not green. They are gray with cracks and match the ground. Bugs do not munch on rocks or stone plants!

The stone
plant looks
like a rock.

Some plants
use a sweet treat
to trap ants and
flies. When the
bugs land on the
“hood” of this plant, they slip
and slide down a tube. Then the
plant eats them up whole.

Menu

THE FISH SHACK

Mains

Fish & Chips	\$12
