

## Directions: Regular Play

1. Place nine cards face down on the table in front of the student(s). (Make sure there is one card representing each of the nine different shapes: square, heart, diamond, circle, triangle, rectangle, octagon, star, and oval.)

2. Let a student roll the double dice.
3. The student determines the shape on the outer die and turns over the corresponding card.
4. The student determines the number on the inner die and reads (or listens as you read) the corresponding question.
5. The student logically answers the question.
6. A token can be given for reinforcement for a correct answer (optional).
7. The card is returned face down to its original place on the table.
8. Repeat steps 2 through 7 with the next student.
9. Continue until all tokens are given out or time runs out.

1

What will happen when you put noodles in boiling water?

2

What will happen if you don't cook the noodles long enough before serving them?

3

What might happen if you ask your mom to cook noodles for dinner?

4

What might happen if your mom cooks noodles for dinner and you don't like them?

1

What will happen if you wash a car?

2

What might happen if you don't wash off all the soap with clean water while washing your car?

3

What will happen if you drive a clean car in the mud?

4

What might happen once you have finished washing your car?

1

What will happen if a mosquito bites you?

2

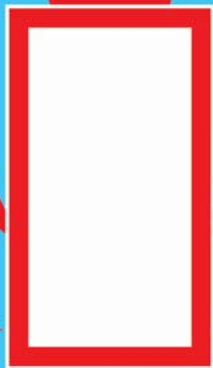

What will happen if you scratch a mosquito bite?

3

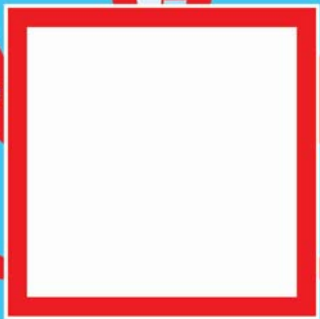

What might happen if you spray on mosquito repellent?

4

What might happen if you slap a mosquito that landed on your arm?
