

## Directions: Regular Play

1. Place nine cards face down on the table in front of the student(s). (Make sure there is one card representing each of the nine different shapes: square, heart, diamond, circle, triangle, rectangle, octagon, star, and oval.)

2. Let a student roll the double dice.
3. The student determines the shape on the outer die and turns over the corresponding card.
4. The student determines the number on the inner die and reads the corresponding question.
5. The student answers the question.
6. A token can be given for reinforcement for a correct answer (optional).
7. The card is returned face down to its original place on the table.
8. The next student rolls the double dice.
9. This continues until all tokens are given out or time runs out.

## Introduction

*Social Situations for Teens Double Dice Deck* provides a motivating way for speech-language pathologists to work on social skills that students in the teen years encounter in various areas of their lives.

This *Double Dice Deck* targets six different types of interactions: peers, school, electronics/social media, community, adults, and transportation. There are 54 playing cards, and each card contains a photograph and four corresponding social situations. This means that your teenagers get up to 216 different opportunities to practice answering questions about social situations that are relevant to their age group and general circumstances.

The unique double dice serves as the motivational component, as the student rolls it prior to finding and answering a corresponding social question. Specific directions for play are found on the reverse side of this card. There is also a double-sided *Game Variations* card that details six alternative ways to use this *Double Dice Deck* in therapy. This allows you to add variety as you use this activity in multiple therapy sessions. A *Content Card* is also included for your convenience in selecting appropriate targets.
