

chapter ten

Moon Landings

Neil Armstrong and Buzz Aldrin stepped on the moon. They were the first two humans to do this. They were on *Apollo 11*. This was a spacecraft. It launched in 1969. After that, there were six more moon landings. Twelve **astronauts** have been on the moon. Astronauts are pilots. They fly to space.

But theorists think the moon landings were all faked. The “space race” was a competition. It was between the United States and Russia. Theorists think the U.S. lied. The U.S. wanted to beat Russia. Armstrong and

Theorists think Stanley Kubrick helped NASA. Kubrick makes movies. He made 2001: A Space Odyssey.

Aldrin were thought to be actors. NASA made a secret film set. They took fake photos of the moon.
